9. **HERITAGE AGREEMENT**

10. **STATEMENT OF SIGNIFICANCE**

Beverley Fire Station, comprising the Appliance Room and Quarters in Inter-War Stripped Classical style and the Storage and Toilet Building, both constructed in 1948, has cultural heritage significance for the following reasons:

 - the place is a rare remaining example of its type and period, comprising a single appliance room and accommodation;
 - the place is a good example of the Inter-War Stripped Classical style;
 - the place contributes to the historic streetscape and collection of interwar style buildings in Vincent Street, Beverley;
 - the place has strong social and historic value as a fire station and the home of the Beverley Volunteer Fire Brigade for over 50 years from 1948; and,

the place was designed by architect Keith Duncan, who was responsible for the design of fire stations in Western Australia from 1926 to 1960.

The concrete slab that was the floor of the pre-painted corrugated galvanized steel shed (removed) is of no heritage significance.
