 - City of Stirling Municipal Inventory: 21/07/1992
 - draft (1991)
 - Register of National Estate: nomination 04/04/1990
8. CONSERVATION ORDER
9. HERITAGE AGREEMENT
10. STATEMENT OF SIGNIFICANCE
Maylands Brickworks, comprising an Hoffman Kiln, section of drying sheds, pug mill, gate house, change rooms and workshop, has cultural significance for the following reasons:
 - the place is an important example of brick making technology and is a significant example of industrial archaeology;
 - the form and scale of the kiln and chimney are landmarks in the Maylands Peninsula;
 - the nearby clay pits, excavated to provide clay for brick making, are significant features of the Maylands Peninsula;

the place has a close association with Mr R. O. Law who established the brickworks and who was a significant industrialist in Western Australia

the place is highly valued by members of the Maylands community: initially, as a workplace and, since closure, as a recreational venue.

the Hoffman Kiln is the only remaining one in Western Australia and together with the remaining section of the drying sheds, the pugmill and machinery, the place presents a rare example of the development of brick making technology and is scientifically significant and of educational value.
